

To whom it may concern,

My name is Alexandre Reeberg de Mello, and I am currently the Artificial Intelligence coordinator at CERTI Foundation, and proud to offer my recommendation of Bruno Mingoti, with whom I have worked for half a year in partnership with NEO Empresarial.

Bruno worked on the first project of the partnership and guaranteed that all the high expectations that were set were fulfilled. Since the first contact, he showed herself as a professional and delivered results that were beyond expected.

In this project, for the last six months, Bruno worked on the development of a computer vision project to identify wrecks, vessels, and people lost in the ocean. The project encompasses the data annotation, object detection model implementation and fine-tuning, and performance evaluation. He, along with his team, have delivered a Proof-of-Concept matching the pre-defined requirements.

During the project development, I have experienced an individual with an ability of learning fast while also working on feedback and a great critical thinking, while also quickly understanding the business context. In addition, he always challenged herself to deliver high quality deliveries. Therefore, it is without reservation that I recommend Bruno for this internship position.
