

To Whom This May Concern,

My name is Lucas Tavares, I am currently a Data Engineer at R&D Department of WEG Motors, and I am proud to offer my recommendation of Bruno Mingoti, with whom I worked for 2 months in partnership with NEO Empresarial.

During this period, Bruno worked on the development of the automation of a Spectrum Vibration report and developed a functional prototype of this solution. This project was extremely important for our IoT Platform solution - Motion Fleet Management combined with WEGscan - Vibration non-invasive Sensor.

In the project we developed with Bruno, I have experienced an individual with an ability of understanding the current scenario and applying it as resources for her work, proposing innovative solutions. The main hard skills developed by Bruno were Python, Plotly, JS, HTML and CSS. In a few months, it was impressive the use of these tools. The main soft skills developed by Bruno was good interpersonal relationship and proactivity.

Thus, to summarize my impressions about Bruno, I would say he has consistently shown self-assurance, initiative, and competence, while also developing a great relationship with the team. Therefore, I do not hesitate in recommending Bruno for this internship position.

Best Regards,
