

To whom it may concern

Letter of Recommendation

Dear Sir or Madam,

It is my pleasure to write this letter of recommendation for Mr. Bruno Mingoti, who has worked as a student assistant (Hiwi) at our lab and successfully completed his thesis titled, "Filtered backprojection combined with deep learning-based sinogram denoising for improved industrial CT reconstruction". During his time here, Mr. Mingoti has demonstrated exceptional technical skills, a strong work ethic, and a high level of academic proficiency.

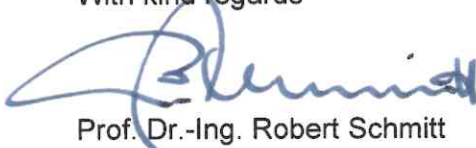

Below, I highlight some of his key contributions and achievements that have impressed me the most:

- In his bachelor thesis, Mr. Mingoti developed two GPU accelerated CT reconstruction methods, including a classical approach and an enhanced deep learning-based version. He benchmarked both against the institute's software and demonstrated clear improvements in reconstruction quality and performance.
- As a student assistant, Mr. Mingoti developed server backend and frontends for automated data stream management. He implemented database operations for storing and signing measurement data sets. He executed optical measurements and their analysis in the context of industrial projects. Furthermore, he assisted in hosting the 3DMC - Europe's finest metrology event.

During his time as a master thesis student and as a student assistant, I found Mr. Mingoti to be an intelligent, talented, ambitious and focused young person. Regarding the many faceted incorporation of Mr. Mingoti into the projects of the department, I can conclude that the knowledge Mr. Mingoti has gained prepares him well for his future career. I am confident that he will handle all challenges in an excellent manner and with high proficiency. Therefore, I would like to recommend Mr. Mingoti without any hesitation.

Please do not hesitate to contact me if you have any further questions.

With kind regards

Prof. Dr.-Ing. Robert Schmitt
